

TIMBER CARE GUIDE

TIMBER

- Remove any liquid spills or stains immediately
- For tougher spills or stains, clean with an extremely mild detergent and lightly damp cloth
- Ensure to completely dry the surface immediately
- Never use harsh or abrasive cleaning products as this will affect the timber and finish
- Avoid exposure to direct sunlight, salt air or moisture as this may cause warping and cracks
- Ensure the timber is not placed near air conditioners or heating units
- Regular dusting and wiping down with a soft lint free cloth is recommended
- Ensure timber is dry at all times with no wet or damp items hung over timber products
- Avoid contact with hard or sharp objects as this may cause scratching

FABRIC

THIS IS A GENERAL GUIDE ONLY

Always refer to the fabric supplier for cleaning recommendations designed for your type of fabric

- Always test on a hidden area first to ensure the colour and finish is not affected
- Treat spills or stains immediately with warm water and mild detergent
- Professional cleaning is recommended regularly and for removal of tough stains
- Ensure to remove upholstered panels prior to professional cleaning

VINYL

THIS IS A GENERAL GUIDE ONLY

Always refer to the vinyl supplier for cleaning recommendations designed for your type of vinyl

- Wipe spills and stains with a dry lint free cloth promptly
- If required, clean the affected area with a soft cloth using a non-abrasive cleaner and wipe dry
